Data Mining: WEKA

Assignment #2

Dr. Esam Othman

Dr. Abeer Mirdad

Choose two distinct datasets from the UCI Machine Learning Repository for Clustering task.
For each dataset, complete the following steps:

01

Dataset Analysis

- Select a dataset and study it.
- Write a short report that describes the problem.

02

Data Preparation

- Prepare the input file in the rtff format to ensure compatibility with the WEKA tool.

03

Model Development

- Use the WEKA tool to analyze the dataset and develop an appropriate model.
- Discuss your findings, including the model's accuracy and any other relevant evaluation metrics.

Please refer to the UCI Machine Learning Repository for dataset selection:

<http://archive.ics.uci.edu/ml/index.php>

Complete all parts of the assignment and ensure your report clearly documents your methodology, analysis, and insights.
